#### THE TALMAGE SERMON

#### The Great Divine Sounds the Praises of the Redeemer.

In this discourse Dr. Talmage sounds the praises of the world's Redeemer and puts before us the portraits of some of John iii. 31. "He that cometh from above is above all.

The most conspicious character of history steps out upon the platform. The finger which dismonded with light, pointed down to him from the Bethlehem sky was only a ratification of the finger of prophecy, the tinger of genealogy, the finger of chronology, the finger of events-all five fingers point ing in one direction. Of course thought is the cargo, and words are only the ship, but how fast would your cargo get on without the ship? What you need, my friends, in all your work, in your Sunday school class, in your re-formatory institution, and what we all need is to enlarge our vocabulary when we come to speak about God and Christ and heaven. We ride a few old words to death when there is such illimitable resource. Shakespeare employed 15,000 different words for dramatic purposes, Milton employed 8,000 different words for poetic purposes, Rufus Choste employed over 11,000 different words for legal purposes, but the most of us have less than 1,000 words that we can manage, less than 500, and that makes

us so stupid. When we come to set forth the love of Christ, we are going to take the tenderest phraseology wherever, we find it, and if it has never been used in that direction before all the more shall we use it. When we come to speak of the Better die in the wilderness, far from glory of Christ, the conqueror, we are true shadow and far from fountain, going to draw our similes from trumphal arch and oratorio and everything grand air waiting for our body, unknown to and stupendous. While the Man Dug the Grave They Ran Away, But Was Followed and Arrested

N. W York.

THE WOWAN WATCHED

An Italian who said he was Givrio Buttaccavallo, living on the lower East Side of New York city, and a pale faced sirl of 18, who refused to say anything about herself, were committed to the Westchester county jail at White Plains Wednesday night on a charge of burying a live child beneath three feet of earth at the foot of a ravine border ing the village of Hastings-on-the-Hudson. A contractor's foreman, who dug the child from the grave and saved its life, caused the arrest of the couple

The child may die. Buttaccavallo and his companion were arrested on their way from Has tings to Yonkers. The arrest was made on a Warburton avenue trolley car. Warburton avenue is the road that conneets Yonkers with Hastings on the Hudson. It is about five miles in lenghth and extends through a billy country where there are but few konses The road crosses a ravine near the Hastings village. A brook known as Rowley's brook flows through ravine. It was on the bank of this brook that the child was buried.

Patrick McAvoy, foreman over a gang of laborer, was at work building a rail road trestle over this brook. They were a quarter of a mile from Rowley's bridge, which spans the brook at Warburton avenue. The men quit work at 12 30 o'clock Wednesday. McAvoy walked toward Warburton avenue to go to lunch at his home in Hastings. Ho passed through the ravine along the

bank of the brook. About three hundred feet ahead of him he saw a man and woman kneeling on the ground The man appeared to be digging in the ground. As MaAvos approached the woman beckoned to her ompanion as if to tell him to hurry with the work he was doing. The man glanced up and seeing McAyoy ap proach hurriedly filled in the hole he had dug Then as the woman started to run toward the trolley road the man stopped and picked up a bush which he placed over the newly-turned earth. He hastened after the woman and they crossed Warburton avenue and disappeared in a ravice on the other side of the trolley tracks.

McAvoy hurried after him He saw the man put a hatchet under his coat and he believed that the stranger had used it to bury or dig up a tressure. When Mc Avoy got to the crown of the hill on Warburton avenue the man sud woman were not in sight. Then he seen the man digging.

As he approached McAvoy says he heard the cries of a baby. He climed over a hedge and throwing aside the bush, began to dig up the earth with his hands. After he had removed about three feet of earth he found a bundle of baby about three weeks old and ap-

the village school. Mc Avoy then ran to the headquarters of the village police and reported the case. He described the man and wo nan whom he had seen burying the child and the village police telephoned the description to the police of Yonkers.

Conductor Walsh started on his trip back to Yonkers. About a mile and a half out of Hastings a man and woman signalled the motorman to stop. When Welsh saw the couple he made up his mind that they were the ones who had buried the baby and told the motor man to call the first policeman they met when Yonkers was reached. At that city the motorman shouted to policeman Archer, and he put the couple under arrest

## A Railrood Levied On.

The Columbia State says a rather unusual case has just developed in Barnwell county. Thirteen miles of railroad track and right of way have been levied upon by the sheriff that county and will be advertised for sale on the ap ed that Peritentiary Guard Watts fell into an unprotected out in this city and was severely injured. He brought suit in Barnwell sounty for damages and got a verdiet of \$7,500. It seems that the South Bound Railroad company, against which the verdict was allowed, has refused to pay the amount of the judgement, upon what grounds is not yet known and the Sheriff of the county has proceeded, failing to find defendant company, to levy upon its track. This levy was made a few days ago, and complicates the matter considerably, as the Scaboard trains are run-

averted by the rainy and cloudy There was much supshine and dry weather until Thursday right, when a warm rain set in that continued throughout Friday and Saturday, but on the latter day the falling temper sture made the rain chilling, and over the western counties the precipitation was at times in the form of hail, snow or sleet. Snow flurries were observed as far eastward as the central counties. The precipitation was heavy over a large portion of the State, amounting to tween three and four inches in many cealities, and did much damage by packing p'oved lands and washing gul lies in terraces, while freshets occurred n many streams, flooding bottom lands Over the southess ern counties the rain was needed and proved beneficial

Farm work rapid progress ov r the upland corn and cotton planting is practically finished, and tobacco was largely transplanted under faverable conditions, although the plants are small; rice planting also made rapid progress, except in the Georgetown district, where freshets and high tides broke the river banks and flooded the fields, preventing planting. In these sections, corn and cotton are coming up, but germination is slow and stands generally poor, necessitating much replanting, but with exceptions where stands are good. Corn is receiving its first cultivation in the southeastern counties, and oats are heading. There, too, truck and gardens, and minor cops generally, are doing well, and farm work is as far advanced as usual at this season.

In the central and western countries. and particularly in the North Carolina border counties, the conditions were less favorable, and although much upand corn and some cotion has been planted, very little is up, as the ground has been too wet and cold for favora ble germination, and stunds of such crops that are up are poor.

The ground was fit to plow, over the western half of the State, on from two to four days only, and the recent rains will still further delay farm work on uplands, while bottom lands will be too wet for a long time. Some plowed lands have been so packed by the heavy rains that they will have to be plowed again to fit them for planting. The heavy rains have seemingly im
